

The different times for the maps in the Hoja Trabajo 6, with respect to map timing.

Total Time:

Total Time:

TreeMap: 1,198 ms

HashMap: 1,099 ms

LinkedHashMap: 1,000 ms

Interestingly the most efficient map with respect to the CPU usage turned out to be LinkedHashMap with just 1,000 ms, meanwhile the lowest map is TreeMap with 1,198 ms, also 200 ms longer. Meanwhile, Hashmap is in between with nearly 1,099 ms.

These results were obtained using VisualVM 2.1.10, the picture for these results can be found in the directory processTime in Analysis.
